dds

WINDOOR - windows, doors and construction elements are the topics of this specialist dds insert. WINDOOR always supplements dds in March, June, September and December. Design, construction, use of semi-finished products and ready-made construction elements as well as machine technology and construction physics are typical themes of **WINDOOR**. With an additional circulation to 6,000 specialised companies, dds offers information to window and facade constructors, door manufacturers, glazier's workshops and fitters.
